Multi-Head Spindles

Custom Components for
Machine Tool Attachments

The SYSTEMATIC Multi-Head Range exclusively manufactured by JENA-TEC provides a wide range of engineered solutions for High Productivity Machining. Our experienced engineers can design or retro-fit our multi-head components into your Machining Centre to maximize the productivity demands of today's environment, offering you time and cost savings in the manufacturing process.

Single or Multiple Heads for:

- Block Boring
- Drilling & Tapping
- Reaming
- Dual Spindle with Indexing Rotation
- W Axis Slide Function
- Gear and Belt-Driven Multiple Spindles

JENA-TEC Advantage:

- Designed to your Specifications.
- Extensive Proven Designs from the SYSTEMATIC's Archives.
- Utilises the Latest HSK, ISO or BT Tooling Systems.
- Rigid Cast-Iron Housing.

In addition to Multi-Head Spindle Systems, JENA-TEC's expanding product range includes an array of Linear Motion Components for numerous industries. With over 30 years of manufacturing expertise, coupled with our commitment to state-of-the-art manufacturing solutions, JENA-TEC is your one-stop source for Motion Components.

Quality. Service. Precision.

The name, JENA-TEC, is closely linked to the German town of Jena where it has maintained one of its manufacturing facilities for over 30 years.

JENA-TEC . . . a Proud Heritage of Tradition and Quality.

Our state-of-the-art manufacturing facility, Jenaer Gewindetechnik GmbH, is located in Jena, Germany. JENA-TEC has a proud heritage and a strong international presence both in the United States and United Kingdom with a variety of linear motion products used in numerous applications around the world.

Quality.
Service.
Precision.

When customers think of JENA-TEC, the words quality and exceptional service come to mind. Not only do we manufacture Precision Linear Motion products, but we design, engineer, reverse-engineer, repair and refurbish these products to our customers' specifications.

What sets JENA-TEC above the competition is that we provide direct contact support from JENA-TEC engineers. Our experienced experts can utilize proven solutions and new technologies to improve your way of manufacturing.

Whether you need new parts or assemblies, need replacement parts, or need our engineers to re-create, retrofit or reverse engineer from sample, print or failed part, JENA-TEC is your value-added solution for your Linear Motion needs.
